DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1- 6, drawn to combined circuit switching and packet switching, classified in class 370, subclass 352.
 - II. Claims 7 - 21, drawn to duplex communications, classified in class 370, subclass 276.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions vary in that group II is only useable in systems comprising plural frequency, time division multiple access, time division duplex, channels; but group I must contain a tethered transceiver that combines and transmits voice and data while the mobile unit receives and separates the voice and data.
3. A telephone call was made to Mr.. William Munch on 4/02/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2663

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
